

Exp No: 14: EMBEDDED C PROGRAM TO DISPLAY “HELLO WORLD” MESSAGE

PROGRAM:

```
#include <reg51.h>

#include <stdio.h>

void main(void)
{
    SCON = 0x50; // Serial mode 1, 8-bit UART, enable receiver

    TMOD = 0x20; // Timer 1, mode 2, 8-bit auto-reload

    TH1 = 0xFD; // Reload value for 9600 baud

    TR1 = 1;    // Start Timer 1

    TI = 1;     // Set transmit interrupt flag

    while (1)
    {
        printf("Hello World !\n");
    }
}

Output :
```
